PROFESSIONAL SUMMARY

Senior SQA Engineer with 7+ years of web, mobile, and API quality assurance across fintech, e-commerce, travel, healthcare, logistics, and enterprise SaaS, most recently leading a distributed QA team for a B2B SaaS platform serving **100,000+ businesses**. Owned test strategy, test plans, **2,000+ case regression suites**, and release sign-off; raised automation coverage from **~20% to ~85%** and introduced AI-driven QA (**Claude Code skills, LLM agents**) that turned days of manual effort into minutes. Seeking Senior/Lead QA roles in the UAE.

WORK EXPERIENCE

Senior SQA Engineer

May 2022 – August 2026

Motive (formerly KeepTruckin) · Remote

- Led a distributed QA team across product lines, defining cross-team test strategy and QA processes; owned test plans, estimation, **2,000+ case** regression suites, and release sign-off; hired and mentored engineers.
- Partnered with Product, Dev, and DevOps on risk assessment and **go/no-go release decisions**; reported quality KPIs and release readiness to engineering leadership; owned test environment and data strategy.
- Spearheaded Cypress, Selenium, and Playwright automation on **Page Object Model** frameworks built from scratch, leading tool evaluation and raising coverage from **~20% to ~85%** in Jenkins and Azure DevOps CI.
- Built RestAssured API frameworks with **JSON Schema contract validation** against Swagger/OpenAPI specs, cutting manual API testing by **~60%**; validated backend data with Postman and SQL.
- Led quality validation of the Fleet Dashboard, Driver App, AI Dashcam, and Vehicle Gateway for a platform serving **nearly 100,000 businesses**, covering ELD/HOS (FMCSA) compliance, IoT, GPS, and telematics; executed mobile testing via Appium and BrowserStack.
- Built a library of custom **Claude Code skills** automating the API pipeline, weekly release process, and bug/user-issue triage; the **HOS (Hours of Service) Analyzer** cut test-data creation from days to minutes, and diagnostic skills proposed fixes for UI/backend defects, shortening developer turnaround.
- Architected LLM-based QA agents (LangChain, OpenAI APIs) for test data generation, defect triage, regression analysis, and Datadog/Splunk log review, auto-drafting Jira reports and cutting triage time by **~40% per sprint**; prototyped multi-agent workflows with CrewAI and AutoGen.
- Led performance and load testing with **JMeter** and **LoadRunner** and security testing with **OWASP ZAP** and **Burp Suite** against the OWASP Top 10 across web and API layers.

SQA Engineer

February 2019 – April 2022

Cubic Solutions Inc. · Lahore, Pakistan

- Designed and implemented an accessibility testing strategy ensuring **WCAG 2.1 AA** compliance using axe DevTools, WAVE, and Google Lighthouse; validated screen-reader compatibility with NVDA and JAWS.
- Engineered test scenarios and cases from business requirements, consistently achieving **zero critical escaped defects** across consecutive production releases.
- Executed functional, regression, smoke, sanity, and integration testing for web apps and ERP/CRM systems (SAP, Salesforce, Zoho), managing defects in Jira and Bugzilla and cutting defect leakage by **~30%**.

- Partnered with developers to triage and verify defect fixes, cutting average resolution time by **20%**.
- Established QA documentation standards and a knowledge base, cutting new-hire ramp-up by **~50%**.
