## PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 7+ years building quality into enterprise SaaS, most recently at **Motive**, a US high-growth fleet-management platform serving 100,000+ businesses. Built automation frameworks from scratch that took critical-journey coverage from **0% to ~85%**, led QA across product lines with **2,000+ test case** regression suites and release sign-off, and put **AI agents into production** on AWS and Azure, cutting defect triage time by **~40%**. Combines deep **quality engineering** with hands-on **AI delivery** across **Python, Java and JavaScript**, and owns problems end-to-end, from requirements to a deployed fix.

| 7+ Years | ~40% | Days → Mins | 0% → 85% |
|---|---|---|---|
| Enterprise SaaS, web, mobile & API | Faster defect triage with AI agents I built | HOS test data via custom AI tooling | Automation coverage |

## WORK EXPERIENCE

### Senior SQA Engineer

May 2022 – August 2026

Motive (Formerly KeepTruckin) · Remote

- Led a team of QA engineers across product lines: owned test strategy, effort estimation, regression suites of **2,000+ test cases** and release sign-off, communicating scope, risk and readiness to engineering and product.
- Owned quality for the Fleet Dashboard, Driver App, AI Dashcam and Vehicle Gateway on a platform serving **100,000+ businesses** (IoT, GPS, telematics, ELD/HOS); mobile automation with Appium and BrowserStack.
- Developed web automation frameworks from scratch with **Playwright, Cypress and Selenium**, growing critical-journey coverage from **0% to ~85%**, run on every build via Jenkins, GitHub Actions and Azure DevOps.
- Implemented API automation in **REST Assured** with JSON Schema contract checks against Swagger/OpenAPI, cutting manual API testing by **~60%**; validated data across **microservices, queues and databases**.
- Delivered and ran production **AI agents (LangChain, OpenAI APIs)** for test data generation, defect triage and regression analysis; integrated with **Datadog, Splunk and Jira** to analyse logs and auto-draft defect reports, cutting triage time by **~40% per sprint**; prototyped multi-agent workflows with CrewAI and AutoGen.
- Shipped a production **Claude Code skills** library automating an end-to-end API automation pipeline, the weekly release process and AI-assisted bug and user-issue triage, cutting days of manual effort to minutes.
- Engineered a production **HOS (Hours of Service) Analyzer** encoding FMCSA ELD/HOS compliance rules to generate realistic test data in minutes instead of days, plus skills that trace UI and backend issues to root cause and propose fixes for developer review.
- Architected these tools and automation frameworks, and deployed them as containerised services (**Docker, Kubernetes**) on **AWS and Azure** with CI/CD pipelines.
- Drove performance (**JMeter, LoadRunner**) and security testing (**OWASP ZAP, Burp Suite**) for web and APIs.
- Engaged **directly with customers**: gathered requirements, demoed features, and reproduced and resolved customer-reported issues end-to-end, tracing them from the UI through APIs, services, logs and databases.

### SQA Engineer

February 2019 – April 2022

Cubic Solutions Inc. · Lahore, Pakistan

- Defined and implemented an accessibility testing strategy ensuring **WCAG 2.1 AA** compliance using axe DevTools, WAVE and Google Lighthouse; validated screen-reader compatibility with NVDA and JAWS.

- Derived test scenarios and cases from business requirements, consistently achieving **zero critical escaped defects** across consecutive production releases.
- Executed functional, regression, smoke, sanity and integration testing for web apps and ERP/CRM systems (**SAP, Salesforce, Zoho**), managing defects in Jira and Bugzilla and cutting defect leakage by **~30%**.
- Partnered with developers to triage and verify defect fixes, cutting average resolution time by **20%**.
- Established QA documentation standards and a knowledge base, cutting new-hire ramp-up by **~50%**.

## TECHNICAL SKILLS

| | |
|---|---|
| **AI & LLM Systems** | Claude Code & Skills, Model Context Protocol (MCP), OpenAI APIs, LangChain, CrewAI, AutoGen, Gemini, GitHub Copilot, Cursor, agentic & multi-agent workflows, RAG pipelines, embeddings, vector database (Pinecone), LLM evaluation, prompt engineering, self-healing tests, human-in-the-loop validation |
| **Languages** | Java, Python, TypeScript, JavaScript, C#, SQL |
| **Backend & APIs** | FastAPI, Flask, Node.js/Express, REST, GraphQL, gRPC, webhooks, OAuth 2.0, SSO |
| **Architecture & Delivery** | Solution architecture for internal tools, microservices, message queues (Kafka), containerised deployment, CI/CD pipeline design, requirements to production delivery |
| **Cloud & DevOps** | AWS (Lambda, ECS, S3, API Gateway), Azure (Functions, App Service, AKS) in production, GCP, Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, LaunchDarkly, Git, GitHub, GitLab, Bitbucket |
| **Test Automation** | Playwright, REST Assured, Cypress, Selenium WebDriver, Appium, TestComplete, TestNG, JUnit, Allure, framework design (Page Object Model, data-driven, BDD/Cucumber) |
| **APIs & Integrations** | REST APIs, Swagger/OpenAPI, JSON Schema contract validation, Postman/Newman, SoapUI, Charles Proxy, WireMock/MSW mocking, SAP, Salesforce, Zoho, NetSuite |
| **Testing Practice** | Test strategy, risk-based, functional, regression, integration, UAT, mobile, low-code apps, performance (JMeter, k6, LoadRunner), security (OWASP ZAP, Burp Suite), WCAG 2.1/2.2 |
| **Mobile & Device Cloud** | Android Studio, Xcode, ADB, Espresso, XCUITest, TestFlight, Firebase App Distribution, BrowserStack, LambdaTest, Sauce Labs, Blazor & .NET MAUI apps |
| **Observability** | Datadog, Splunk, Grafana, Sentry, Rollbar, OpsGenie, TrackJS, Firebase |
| **Data & Delivery** | MySQL, PostgreSQL, Oracle, MongoDB, Redis, Agile/Scrum, Jira, TestRail, Xray, Confluence |

## CERTIFICATIONS

- ISTQB Certified Tester – Foundation Level
- SAP Cloud Platform
- SAP Leonardo – IoT
- API Automation using RestAssured
- SAP Ariba Procurement
- Data Science Certification

## EDUCATION & LANGUAGES

**MS Computer Science** · The University of Lahore, Pakistan 2021

**BS Computer Science** · The University of Lahore, Pakistan 2016

**Verified Credentials:** Degrees fully attested and equivalency-certified for UAE employment

**Languages:** **English** — Professional Proficiency **Urdu** — Native
